

RACGP QA & CPD Points

40 Category 1 Points

Now Available

Veterans' MATES Active Learning Module (ALM) Promoting Quality Use of Medicines for Veterans

GPs who receive and complete any two Veterans' MATES modules and complete the eight steps below are eligible for **40 Category 1 points**.*

What do I need to do?

Each ALM involves completing two Veterans' MATES Modules. You can undertake any combination of modules from the Veterans' MATES program from Module 14 onwards. You must complete two modules to obtain 40 Category 1 points.*

For each module you must complete the following steps:

- 
- 1 Review the feedback on specific patients included in the Veterans' MATES module.
 - 2 Review the 'Key Points' on the Therapeutic brief. These are the learning objectives for each module.
 - 3 Consider the information in the Therapeutic brief and its relevance to your patients.
 - 4 Conduct a review of your own practice against the information in the Therapeutic brief.
 - 5 Consider how the 'Key Points' in the Therapeutic brief might apply to the selected patients. This will involve reviewing the medical notes of these patients.
 - 6 Follow up and review selected patients after reading the Therapeutic brief and considering base-line data. This may involve annotating case notes and contacting individual patients to schedule consultations.
 - 7 Evaluate and document your learning by:
 - (1) **Keeping a record** of the patients identified in the Veterans' MATES module.
 - (2) **Recording** changes made to their management and patient outcomes.
 - 8 Complete the module Response Form and return it to the Veterans' MATES project in the prepaid envelope provided.

NB Estimated time to complete = 3 hours per module (6 hours for 40 Category 1 points)

How do I register for QA & CPD points?

To register for the ALM (40 Category 1 points) return your response form in the prepaid envelope and include your RACGP QA & CPD number.

* Only available to GPs who are managing veterans selected in Veterans' MATES modules.
